This is the best experience and knowledge I could ever have asked for. The knowledge and technology that have been shared to me are more than the ones I learned in school. The things I learned, I applied it in my internship, and even after that, I was still able to learn more as a programmer. The encounters and stories of one another really helps us have an overview of what we should become in the future. Words cannot express how Blessed and Happy I am that I chose this company. Big thanks to SIR BOK TOM and SIR ED for allowing me to experience this before I graduate.
